

Ultra-Slim Lockable Storage Drawer

As its name suggests, Adapt's Ultra Slim Storage drawer is a very low-profile solution for personal storage under the desk.

Easily mounted beneath any working surface, it has minimal impact on knee hole space but still offers a high-quality and functional option for keeping all manner of work-related essentials close at hand.

Constructed from steel and finished with durable powder-coat paint, the USS drawer is suspended from full-extension ball-bearing runners for smooth and effortless opening. The interior is even lined with recycled synthetic felt to protect the contents.
