

# Cable Management

## Create a safe workspace

Cable management organises and clears the chaos from under your desk to the floor. Effective cable management reduces accidents and prevents damage to data connections and power cables, while still offering easy access to wires.

Our range of cable management products are available in various standard and customised lengths to suit any type of workstation, including sit-stand desks.

# Cable Basket

With the use of the Cable Basket, you gain maximum legroom, reduce trip hazards and tangled damaged cables. The spacious basket holds a large capacity of under-desk cabling. It securely fixes underneath (and to the back) of your worksurface, channelling cables to the required locations.

For optimum cable management, use Cable Basket in conjunction with one of our other cable management products.

Product	Dimensions (LxWxH)	Fixings	Construction	Colour
CABM-152	1426x152x87mm	Cable Basket Brackets	Wire Mesh Construction	Black
CABM-153	1630x152x87mm	CABM-379BK

# Cable Spine

Cable Spine is a flexible spine with the option to add extra links. This makes it the ideal choice of cable management for height adjustable desks. It carries cabling from the Cable Basket to the floor in any direction and has a weighted base that grips the floor. It's quick and easy to install and an application tool is supplied for threading cables.

Product	Dimensions (LxWxD)	Fixings	Construction	Colour
CABM05XX	614x100x65mm	Screws into the underside of the desktop or attaches to cable basket	Polypropylene	Black or Light Grey
