

SpaceArm

Smart, scalable, flexible

With its unique gas-lift system, SpaceArm is one of the strongest, most durable monitor arms on the market. Its flexible design means that SpaceArm can be adapted to meet new demands, from adding extra monitors to supporting different screen sizes. SpaceArm combines style with value and efficiency.

Why choose SpaceArm?

Scalable and future proof

You can swap components of your standard SpaceArm to create other configurations, without changing the whole product. This includes the Laptop Stand and Flyt touchscreen arm.

Adjustable

Simple to adjust, whether you're sitting or standing.

Sustainable design

SpaceArms can be reused, re-purposed and recycled.

Customisable

Options to support:

- All sizes of monitors
- Many different mounting requirements
- A wide range of working postures
- Monitor weights from 0.4 - 13.6kg
- Any colour preference

Reduced clutter

Integrated cable management keeps wires tidy and easy to access.

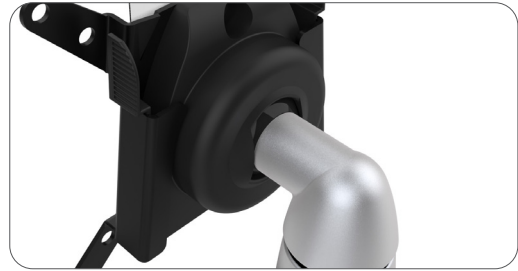

Simple & Intuitive

Operating instructions are attached to all monitor mounting plates.

SpaceArm has several unique and user-friendly features:

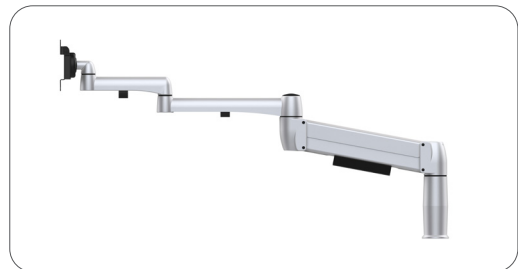

Quick-change mount option allows monitors to be changed quickly and efficiently. There is also a direct mount option for added security.

Patented constant pressure joint offers 360° movement

Plastic clips hold cables securely and allow ease of movement

Vertical reach up to: 558mm
Horizontal reach up to: 692mm

Gas spring holds the monitor in position and can support weight ranges 0.4 - 13.6 kg

Adjustment screw offers accuracy and reliability for counterbalancing monitor weight

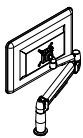

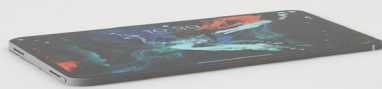

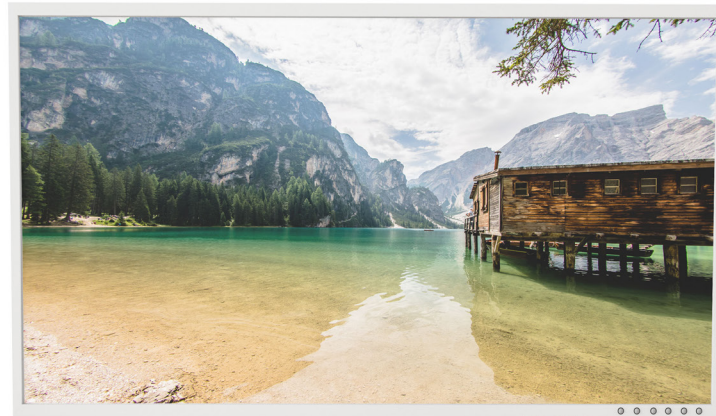

Powder coat polymer is tough, durable and easy to clean

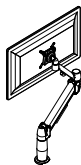

Rotational stop prevents monitor from swinging too far

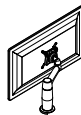

Single Monitor SpaceArm
