

Cable Management

Create a safe workspace

Cable management organises and clears the chaos from under your desk to the floor. Effective cable management reduces accidents and prevents damage to data connections and power cables, while still offering easy access to wires.

Our range of cable management products are available in various standard and customised lengths to suit any type of workstation, including sit-stand desks.

Cable Basket

Adapt Cable Baskets enable you to gain maximum legroom, reduce trip hazards and tangled, damaged cables. The spacious basket holds a large capacity of under-desk cabling. It securely fixes underneath your work surface with our proprietary mounting brackets, channelling wires to the required locations.

For optimum cable management, use the Cable Basket in conjunction with one of our other cable management products.

Cable Basket has several unique and user-friendly features:

Strong and rigid welded steel construction with a hardwearing powder-coated finish for ultimate durability. The thickness of the powder coating eliminates sharp edges and prevents corrosion. Due to the powder-coated finish, an unpainted brass earthing tab ensures maximum electrical safety.

Large capacity to accept power bars, plugs and a multitude of cables, fully future-proofing the workstation. Adapt Cable Baskets can be subdivided using sections of Cable Spine for optimum management of wires.

The Cable Basket Brackets make easy work of installing the basket with a simple push-and-clip fitting. This also allows the user to unclip just one side of the basket, so cables can be fed in from the front or rear, or to access power and data bars.

Cable Baskets can be ordered with our plastic mounting brackets to offer a highly flexible mounting solution. The brackets can be split in two to avoid substructures under the desk and to offer a second height position if desired.

Compatible with both the Adapt Cable Mesh and Cable Spine mounting brackets.

Product Code	Description
CABM-391BK	Cable Basket - 1223 mm Reduced Height with Mounting Brackets - Black
CABM-392BK	Cable Basket - 1426 mm Reduced Height with Mounting Brackets - Black
CABM-393BK	Cable Basket - 1630 mm Reduced Height with Mounting Brackets - Black
CABM-379BK	Cable Basket - Mounting Bracket Set

Mesh+

Cable Mesh+ is specifically designed for height-adjustable desking applications, concealing and organising large amounts of cabling from your cable basket or worksurface to the floor.

The top bracket can be screwed into the work surface or attached to our Cable Baskets. Cable Mesh is suitable for all standard height-adjustable desking.

It features internal cable segregation, cable tie loops, and a weighted base with a neoprene pad that grips the floor, preventing damage.

Cable Mesh+ has several unique and user-friendly features:

A top mounting clip that can be screwed under the worksurface or hooked through a cable basket. The mounting clip also features several hooks that allow for fine-tuning of the length and mounting position, as well as cable tie loops for securing cables.

Aluminium rings stitched into the fabric securely connect the top and bottom mounting clips, helping to maintain the shape and making it easier to insert or remove cables.

The hi-tech mesh fabric not only hides cables from view, but is lightweight, tough, breathable, and has 4-way stretch. The mesh fabric has a full-length Velcro closure. If damage occurs, the fabric can be replaced without the need to buy an entirely new product.

A full-length internal cable segregation pocket for power and data cables. This pocket is simple to use with a Velcro closure that runs from top to bottom.

At the bottom of Cable Mesh+ is a heavily weighted base that features a soft and grippy pad on the underside, as well as several cable tie loops for securing cables in place.

Cable Mesh+ comes with fixing screws and cable ties in the box.

Mesh Slim

Cable Mesh Slim offers a highly functional and cost-effective solution for managing cables between sit-stand workstations and power or data sources at lower levels.

Constructed from a flexible, stretchy mesh fabric, Mesh Slim not only keeps messy cables tidy and safe but also enhances the appearance of any desk setup.

With a full-length Velcro closure, Mesh Slim makes light work of adding a multitude of cables and reconfiguring them later is just as easy.

A hook secured with Velcro at each end of the product enables the installer to secure Mesh Slim to the supplied mounting bracket, to cable trays, cable baskets or floor boxes.

Cable Mesh Slim has several unique and user-friendly features:

A simple hook and screws are provided for mounting under the desk surface.

A loop secured by Velcro is integrated into each end of Mesh Slim, making it simple to mount the product to existing structures under the work surface, such as Adapt's range of cable baskets.

The mesh fabric has a full-length Velcro closure enabling cables to be added or removed with ease.

The integrated loops allow Mesh Slim to be secured at the base if required.

Mesh Slim can also be adapted for use as a horizontal cable manager inside cable baskets and trays.

The hi-tech mesh fabric not only hides cables from view, but is lightweight, tough, breathable, and has 4-way stretch.

Cable Spine

Cable Spine is a flexible vertical cable management solution with the option to add extra links. This makes it the ideal choice of cable management for height-adjustable desks.

The weighted base features soft neoprene on the underside, allowing it to grip and protect hard floors.

It's quick and easy to install, and the included application tool makes light work of inserting cables.

Cable Spine has several unique and user-friendly features:

A top mounting clip that can be screwed under the worksurface or hooked through a cable basket. The mounting clip also features several cable tie loops for securing cables, preventing strain on electrical connections.

Highly flexible plastic construction, with exceptional memory characteristics, that allows cables to be easily “zipped” into the Cable Spine with the included application tool. This flexibility also means that cables can be removed just as quickly and easily.

A twin-channel design so that power and data cables can be segregated if desired.

At the bottom of Cable Spine is a heavily weighted base that features a soft and grippy pad on the underside, as well as several cable tie loops for securing cables in place.

Can be purchased with 24 extra vertebrae to convert the standard Cable Spine for use on height-adjustable desks. The additional links can also be used to provide horizontal cable management for inside cable baskets or trays.

Mounting screws, cable ties and application tool are all included in the box.
